Summary of Record of Interview Requirements

Manual of Patent Examining Procedure (MPEP), Section 713.04, Substance of Interview Must be Made of Record

A complete written statement as to the substance of any face-to-face, video conference, or telephone interview with regard to an application must be made of record in the application whether or not an agreement with the examiner was reached at the interview.

Title 37 Code of Federal Regulations (CFR) § 1.133 Interviews

Paragraph (b)

In every instance where reconsideration is requested in view of an interview with an examiner, a complete written statement of the reasons presented at the interview as warranting favorable action must be filed by the applicant. An interview does not remove the necessity for reply to Office action as specified in §§ 1.111, 1.135. (35 U.S.C. 132)

37 CFR §1.2 Business to be transacted in writing.

All business with the Patent or Trademark Office should be transacted in writing. The personal attendance of applicants or their attorneys or agents at the Patent and Trademark Office is unnecessary. The action of the Patent and Trademark Office will be based exclusively on the written record in the Office. No attention will be paid to any alleged oral promise, stipulation, or understanding in relation to which there is disagreement or doubt.

The action of the Patent and Trademark Office cannot be based exclusively on the written record in the Office if that record is itself incomplete through the failure to record the substance of interviews.

It is the responsibility of the applicant or the attorney or agent to make the substance of an interview of record in the application file, unless the examiner indicates he or she will do so. It is the examiner's responsibility to see that such a record is made and to correct material inaccuracies which bear directly on the question of patentability.

Examiners must complete an Interview Summary Form for each interview held where a matter of substance has been discussed during the interview by checking the appropriate boxes and filling in the blanks. Discussions regarding only procedural matters, directed solely to restriction requirements for which interview recordation is otherwise provided for in Section 812.01 of the Manual of Patent Examining Procedure, or pointing out typographical errors or unreadable script in Office actions or the like, are excluded from the interview recordation procedures below. Where the substance of an interview is completely recorded in an Examiners Amendment, no separate Interview Summary Record is required.

The Interview Summary Form shall be given an appropriate Paper No., placed in the right hand portion of the file, and listed on the "Contents" section of the file wrapper. In a personal interview, a duplicate of the Form is given to the applicant (or attorney or agent) at the conclusion of the interview. In the case of a telephone or video-conference interview, the copy is mailed to the applicant's correspondence address either with or prior to the next official communication. If additional correspondence from the examiner is not likely before an allowance or if other circumstances dictate, the Form should be mailed promptly after the interview rather than with the next official communication.

The Form provides for recordation of the following information:

- Application Number (Series Code and Serial Number)
- Name of applicant
- Name of examiner
- Date of interview
- Type of interview (telephonic, video-conference, or personal)
- Name of participant(s) (applicant, attorney or agent, examiner, other PTO personnel, etc.)
- An indication whether or not an exhibit was shown or a demonstration conducted
- An identification of the specific prior art discussed
- An indication whether an agreement was reached and if so, a description of the general nature of the agreement (may be by attachment of a copy of amendments or claims agreed as being allowable). Note: Agreement as to allowability is tentative and does not restrict further action by the examiner to the contrary.
- The signature of the examiner who conducted the interview (if Form is not an attachment to a signed Office action)

It is desirable that the examiner orally remind the applicant of his or her obligation to record the substance of the interview of each case. It should be noted, however, that the Interview Summary Form will not normally be considered a complete and proper recordation of the interview unless it includes, or is supplemented by the applicant or the examiner to include, all of the applicable items required below concerning the substance of the interview.

A complete and proper recordation of the substance of any interview should include at least the following applicable items:

- 1) A brief description of the nature of any exhibit shown or any demonstration conducted,
- 2) an identification of the claims discussed,
- 3) an identification of the specific prior art discussed,
- 4) an identification of the principal proposed amendments of a substantive nature discussed, unless these are already described on the Interview Summary Form completed by the Examiner,
- 5) a brief identification of the general thrust of the principal arguments presented to the examiner,
(The identification of arguments need not be lengthy or elaborate. A verbatim or highly detailed description of the arguments is not required. The identification of the arguments is sufficient if the general nature or thrust of the principal arguments made to the examiner can be understood in the context of the application file. Of course, the applicant may desire to emphasize and fully describe those arguments which he or she feels were or might be persuasive to the examiner.)
- 6) a general indication of any other pertinent matters discussed, and
- 7) if appropriate, the general results or outcome of the interview unless already described in the Interview Summary Form completed by the examiner.

Examiners are expected to carefully review the applicant's record of the substance of an interview. If the record is not complete and accurate, the examiner will give the applicant an extendable one month time period to correct the record.

Examiner to Check for Accuracy

If the claims are allowable for other reasons of record, the examiner should send a letter setting forth the examiner's version of the statement attributed to him or her. If the record is complete and accurate, the examiner should place the indication, "Interview Record OK" on the paper recording the substance of the interview along with the date and the examiner's initials.

Subject: Proposed Agenda for Personal Ex. Interview re Reisman apps.

proposedclaims.doc

Ex. Nguyen:

The following Proposed Agenda for our upcoming Personal Examiner Interview is provided pursuant to your request.

Proposed Agenda for Personal Examiner Interview (Nov. 13th, beginning at 2 PM):

Serial No. 09/553,397 (RRR-00-001) (US04)

- 1) Establish that the Hiday reference does not qualify as a prior art reference since it only goes back to March 8, 1996;
- 2) Applicant (Mr. Reisman) would like to propose amending claims 16 and 29 along the lines set forth in the attached Word document to more clearly patentably distinguish over the Young reference.

In Young, the programs in a broadcast data stream are not identified at all, much less are the programs captured and stored based upon object identifiers included in the broadcast data stream. Rather, in Young, the programs are captured and stored at specified time intervals, and not based upon any information contained in the broadcast data stream.

Serial No. 09/553,394 (RRR-00-008) (US11)

Discuss the Joseph reference, and in particular, its many deficiencies with respect to the rejected claims. For example, Joseph does not disclose "a plurality of vendor servers" as recited in the rejected claims. Joseph relates specifically to an interactive TV (ITV) system in which a single vendor computer serves as a vendor server or central computer which communicates with a plurality of clients via a central processing facility.

Serial No. 09/553,393 (RRR-00-009) (US12)

Discuss the meaning of the term "information channels" and the support in the specification for the claim limitations which constitute the basis of the outstanding par. 112 rejections. The previous arguments presented by Applicant will be reviewed, but will be embellished by Mr. Reisman's in-person commentary. Further, Mr. Reisman will be personally present to answer any questions either Ex. Nguyen or SPE Gaffin may have. Further, Applicant seeks clarification of the basis for the outstanding par. 112 rejections.

Sincerely,
Robert Westerlund
Reg. No. 31,439

16. (Amended) A method for operating a user station, comprising:
fetching a schedule from a remote schedule source;
receiving a broadcast data stream, the broadcast data stream including at least one [or more] desired data [objects] object and at least one other data [objects] object,
wherein the at least one desired data object and the at least one other data object are identified in the broadcast data stream by respective object identifiers; and[,]
capturing and storing the at least one [or more] desired data [objects] object from the received broadcast data stream in accordance with the fetched schedule and based upon the at least one desired data object's respective object identifier.
28. (Amended) A user station, comprising:
logic for fetching a schedule from a remote schedule source;
logic for receiving a broadcast data stream, the broadcast data stream including at least one [or more] desired data [objects] object and at least one other data object,
wherein the at least one desired data object and the at least one other data object are identified in the broadcast data stream by respective object identifiers [supplied by a selected one of the data sources to identify receipt of desired data]; and[,]
logic for capturing and storing the at least one [or more] desired data [objects] object from the received broadcast data stream in accordance with the fetched schedule and based upon the at least one desired data object's respective object identifier.
